Summary

AI Developer with 1+ year of experience building LLM-powered SaaS products, NLP pipelines, and RAG systems. Skilled in Python, LangChain, and OpenAI APIs. Passionate about applying GenAI to real-world business problems.

Education

Deogiri Institute of Engineering and Management Studies, Chhatrapati Sambhajinagar, DBATU University B. Tech in CSE (Artificial Intelligence & Machine Learning)	2021 - 2025
VIDYADHAM SCIENCE JR. COLLEGE, Chhatrapati Sambhajinagar HSE (Science Stream)	2019 - 2021

Skills

Languages: Python, SQL

LLMs & GenAI: LangChain, LlamaIndex, OpenAI API, Gemini API, Hugging Face, Ollama, RAG, Prompt Engineering

AI/ML: Machine Learning, NLP, TensorFlow, Computer Vision

Backend & Tools: Flask, FastAPI, Streamlit

Databases: MySQL, Vector DB (ChromaDB / FAISS), PostgreSQL

Data & Analytics: Power BI, Pandas, NumPy

Work Experience

Executive – Tech Development & Support (AI Developer) at Eelanos - Built 4 multi-portal SaaS platforms (recruitment, LMS, data management) with role-based access, user hierarchies, and real-time features using Flask and SQLAlchemy. - Integrated LLM APIs and Local LLMs (Ollama) to automate CV screening, answer scoring, and offline health report generation across multiple domains. - Developed a financial data scraper and interactive multi-company comparison dashboard with visualisations and Excel export using Python and Streamlit. Overall, independently built 6 end-to-end Python applications across fintech, HR, ed-tech, and healthcare, covering AI integration, backend development, and database design.	Aug 2025– present
---	--------------------------

Projects

Blink Guard – Sleep Detection Glasses - Engineered a drowsiness detection wearable using an IR Eye Blink Sensor with Arduino Pro Mini to monitor real-time eye-closure patterns. - Triggered instant alerts via buzzer and vibration motor upon detecting prolonged eye closure, integrated into a lightweight eyewear frame.	Jun 2022
Web Guru: Multi-Site Chatbot - Built a website bot leveraging Langchain for data processing and Gemini API for question answering capabilities and vector DB for efficient storage and retrieval of article embeddings. - Enables multi-source research across any topic by aggregating and querying web articles via semantic search. Tech Stack: Langchain, Web-Scraping, NLP, Gemini API, Vector database, Similarity search. GitHub link: - https://github.com/vedantkasbekar/Website-Bot	Jun 2023
Resume Analyzer - Developed an AI Resume Analyzer using Python, NLP, Streamlit, and NLTK. - Implemented PDF parsing with PyResparser and integrated MySQL database for user data storage. - Provided functionality for parsing resumes, analysing skillsets, and recommending personalized courses and skill enhancements based on job roles.	Dec 2024

Extracurricular Achievements

- Secured 12th Rank out of 250+ teams in SUNHACK 36-hour Hackathon.
- Speaker - DevConf 2026, MIT World Peace University.** Delivered a technical session on **Prompt Engineering 2.0** to an audience of 200+ developers and students, covering advanced prompting strategies, chain-of-thought reasoning, and real-world LLM application design.

Positions of Responsibility

Model United Nations | Delegate of Saudi Arabia

Apr 2024

- Represented the Kingdom of Saudi Arabia in DISEC at Model United Nations, demonstrating strong research, negotiation, and public speaking skills to address complex global security issues collaboratively.
